DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance: The invention as now claimed is not disclosed nor rendered obvious in view of the prior art of record. As to independent claims 1, 10, and 15, the prior art of record fails to teach or suggest, alone or in combination, the recited system, method, and apparatus in which the SCP directs an LNP query to an intelligent traffic routing and control unit when the call is a data call and to an LNP processing unit when the call is a voice call, where the intelligent traffic routing and control unit provides routing directions for the call in response to the LNP query. No prior art was found that discloses or teaches the limitations of claims 1, 10, and 15.
3. No prior art was found that teaches a SCP receiving a LNP query, and then forwarding/routing the LNP query to another location/control unit if the call is a data call or to another location/unit if the call is a voice call, wherein the other location/control unit is the entity provides routing directions for the call in response to the LNP query. Normally, the SCP is the entity, which receives the query, processes the query, and then provides the routing directions for the call in response to the query. However, in the present invention, these limitations are performed by, an intelligent traffic routing and control unit. Therefore, no prior art was found that discloses or teaches these limitations.

4. There is no obviousness double patenting issue, with the claims, since claimed subject matter is different. The parent application does not claim, a system, method, and apparatus in which the SCP directs an LNP query to an intelligent traffic routing and control unit when the call is a data call and to an LNP processing unit when the call is a voice call, and where the intelligent traffic routing and control unit provides routing directions for the call in response to the LNP query. The subject matter being claims in the present invention is different and not related to the subject matter claimed in the parent application.

5. Claims 2-9, 11-14, and 16-20 are dependent upon claims 1, 10, and 15, respectively, therefore, claims 2-9, 11-14, and 16-20 are allowed.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
